Automation for operations teams

Less admin. Fewer errors. Same team.

We are a team that builds automation for operations teams. We build systems that do your team's repetitive work. **Accurately, and at scale.**

30+
Markets covered in one launch

4,000+
Records checked

180+
Errors stopped before release

290+
Client projects planned, no unresolved clashes

3
AI model families tested on accuracy and cost

Six things we build.

Integrations
Systems that share data on their own.

AI processing
AI that sorts your data, measured.

Reporting
Reports that run themselves.

Quality checks
Errors stopped before release.

Scheduling
Plans that stay up to date.

Internal tools
Simple tools for repeat work.

How it works.

1. **Brief** A short written brief
   Tell us the process, the volumes and the systems.
2. **Demo** 20 minutes
   A session on your process: what we can automate, how, and what it costs.
3. **Build** Most builds: 2 to 6 weeks
   Built into your systems, tested on your real data, to an agreed scope.
4. **Go live** Handover and support
   Launched, documented and handed over. We support it as your work changes.

What it costs.

Demo and plan	**Free** A 20-minute demo on your process, then a written plan.
Custom build	From **£1,250** Fixed price, to a written scope. US$1,500.
Support	From **£200** a month Optional. US$250 a month.
Catalogue check	**Free** For Shopify and WooCommerce stores. A product-level list in seconds, with a suggested fix for each.

Nothing starts until you approve the plan.

Six rules for every project.

1. **Automate the repeatable.**
   If a task follows rules, a system should do it.
2. **Check every record.**
   Every system checks its own work before anything goes live.
3. **Run unattended.**
   Reports, logs and alerts are built in.
4. **Work worldwide.**
   Based in the UK. We work in your time zone.
5. **Deal direct.**
   You work with the team that builds your system.
6. **No nonsense.**
   Published prices. A fixed written scope. Plain English.

Free 20-minute demo and written plan.

Send a short brief. We will tell you where to start.
